

DATA ANALYTICS INTERN ROLE

At Sage Corps, we work with students to find the right role based on their experience, skills and qualifications. This intern role description will give you an idea of the type of responsibilities that will be assigned to you during the course of your program. The descriptions below are based on a previous startup role we've offered. However, please note that this internship will vary depending on the startup partners and available roles for that term.

About the Startup:

This startup is a Diversity, Equity, and Inclusion (DEI) and employee wellness platform and was founded by psychologists with the ambition to enable all organizations to build their own uniquely inclusive environment. Right now, DEI professionals do not have the tools they need to create real organizational change. Our software was built with this in mind.

Internship Overview:

As a small company, we are looking for a data analytics intern to help with features development and research. You will be working closely with our co-founder in our office. Your major tasks will be gathering, reporting and analyzing data.

Responsibilities:

- Developing assessments and action plans
- Tracking and analyzing business performance to identify opportunities for growth
- Research and multidisciplinary research
- Validating questionnaires and assessments
- Recruiting people to take part in surveys and analyzing data

Qualifications:

- Pursuing a bachelor's degree in economics, finance, or another data related area
- Knowledge of SPSS
- Must have interest in diversity, equity and inclusion
- Flexible and has an interest in problem solving and research
- Must be quantitatively inclined
