

UX/UI INTERN ROLE

At Sage Corps, we work with students to find the right role based on their experience, skills and qualifications. This intern role description will give you an idea of the type of responsibilities that will be assigned to you during the course of your program. The descriptions below are based on a previous startup role we've offered. However, please note that this internship will vary depending on the startup partners and available roles for that term.

About the Startup:

This startup is currently building a platform to change the industry of personal development. Using science-backed assessments and AI-powered algorithms, we will guide each person on a personally customized journey with the human connection and relevant tools they need, at the moment they need them. This startup aims to provide access to virtual 1:1 coaching sessions, virtual and in-person training on the subjects of their interests, curated digital content and on-demand support from industry experts.

Internship Overview:

We are a relatively new company with a small team of 2 employees, the co-founders. We are working on a substantial amount of new features to our platform and are looking for a UX/UI intern to design and build custom dashboards for the different user types we have. Our ideal candidate will have a go-getter attitude and has a passion for artificial intelligence.

Responsibilities:

- Design and build custom dashboards on our platform, using our existing dashboard as a model
- Perform extensive market research
- Working to build questionnaires based on research including writing new questions, reviewing and translating
- Create individual skills and activities which the platform is assessing

Qualifications:

- Proficient in JavaScript & React JS (Next JS not a requirement)
- Proactive mentality
- Strong problem-solving skills
- Self-motivated and results-oriented
- Ability to interact with cross-functional team and a teamplayer
