

# SAGE CORPS | HOST AN INTERNATIONAL INTERN FOR SUMMER 2024

**Sage Corps** is a global entrepreneurship program that sends top undergraduate university students from the United States abroad to work with startups. This summer, we will send students to Amsterdam, Barcelona, Berlin, Dublin, Lisbon, Madrid, Milan, Paris and Sydney.

There is no cost for startups to participate in our program and host students for the summer. If possible, we ask startups to provide the student with a small stipend to help cover daily meals and public transportation.

“Caroline is helping us improve our application by adding new features and solving issues. Her profound level in AI development and high implication in our project makes her a key part of our team. We are very happy having her with us this summer and look forward to continuing working with her together. She is a part of the team and also helps us doing daily tasks no matter what comes.”

**JAUME SÁNCHEZ**  
CEO AND CO-FOUNDER, 3DTHINKS

## Student Profile

US university undergraduate student

85 different majors

53% speak more than one language

80% are 3rd or 4th year students
