

## DATA ANALYTICS INTERN ROLE

At Sage Corps, we match students with roles based on their experience, skills, and qualifications. This description outlines the types of responsibilities you may take on during your program. Please note that specific responsibilities may vary depending on the startup and role availability.

### About the Startup:

You will be joining a software-as-a-service (SaaS) platform focused on making the returns process more efficient and sustainable for businesses. You'll work with a solution designed specifically for B2B e-commerce operations, helping create a frictionless and fast returns experience for customers. You'll contribute to simplifying the returns process for businesses while supporting a system that prioritizes both efficiency and sustainability—addressing a major need in the e-commerce market.

### Internship Overview:

As the company expands into the Italian market, you will support market entry efforts as a Data Analytics Intern. Your work will include conducting market research, creating presentations, compiling and managing data in HubSpot, and engaging with Italian companies, including delivering pitch presentations.

### Responsibilities:

- Support the development and execution of market entry strategies
- Identify and engage potential partners (e-commerce platforms, retailers, logistics providers)
- Assist with customer onboarding, product demos, and inquiry handling
- Collaborate with cross-functional teams to support platform operations in Italy
- Analyze data to identify trends and inform strategic decisions
- Maintain organized records of research, partnerships, and customer interactions

### Qualifications:

- Major in Computer Science, Statistics, Physical Sciences, Business Analytics, or related field
- Experience with business projects or competitions is a plus
- Knowledge of data analytics, machine learning, and statistical methods is a plus
- Strong interest in data and technology
