

DATA ANALYTICS INTERN ROLE

At Sage Corps, we work with students to find the right role based on their experience, skills and qualifications. This intern role description will give you an idea of the type of responsibilities that will be assigned to you during the course of your program. The descriptions below are based on a previous startup role we've offered. However, please note that this internship will vary depending on the startup partners and available roles for that term.

About the Startup:

You will be joining a Diversity, Equity, and Inclusion (DEI) and employee wellness platform founded by psychologists with the ambition to help organizations build their own uniquely inclusive environments. You'll contribute to a mission-driven team addressing a key gap—many DEI professionals lack the tools needed to create real organizational change, and this software was built with that purpose in mind.

Internship Overview:

As a data analytics intern at a small company, you will support feature development and research initiatives. You will work closely with the co-founder in the office and play a key role in gathering, reporting, and analyzing data.

Responsibilities:

- Developing assessments and action plans
- Tracking and analyzing business performance to identify opportunities for growth
- Research and multidisciplinary research
- Validating questionnaires and assessments
- Recruiting people to take part in surveys and analyzing data

Qualifications:

- Pursuing a bachelor's degree in economics, finance, or another data related area
- Knowledge of SPSS
- Must have interest in diversity, equity and inclusion
- Flexible and has an interest in problem solving and research
- Must be quantitatively inclined
