

SOFTWARE DEVELOPMENT INTERN ROLE

At Sage Corps, we work with students to find the right role based on their experience, skills and qualifications. This intern role description will give you an idea of the type of responsibilities that will be assigned to you during the course of your program. The descriptions below are based on a previous startup role we've offered. However, please note that this internship will vary depending on the startup partners and available roles for that term.

About the Startup:

You will be joining a startup focused on modernizing the fashion industry by making it more accessible, respectful, and eco-friendly. You'll work on a photography service designed to simplify model photography in fashion, offering fixed, transparent pricing and the ability to select themes and fully customize photoshoots online or via call. Designers will be able to send in their clothing and receive ready-to-use, high-quality photos within 10 days.

Internship Overview:

As part of a sustainable fashion startup, you will work as a Software Developer Intern supporting the development of multiple websites and their corresponding apps. You will collaborate with the team to ensure all platforms are completed to a high standard as the company prepares for launch.

Responsibilities:

- Collaborate with our team to develop, test and deploy websites and apps
- Develop and maintain software documentation
- Troubleshoot and debug software issues
- Collaborate with cross-functional teams to identify and prioritize software features
- Stay up-to-date with emerging trends and technologies in software development

Qualifications:

- Proficiency in JavaScript and its frameworks, such as React and Node.js.
- Knowledge of HTML, CSS, and web development best practices.
- Skills on User Experience
- Must be a creative problem solver and intrinsically motivated
- Works well under pressure and able to multitask
- Strong problem-solving abilities
- Highly developed analytical and organizational skills
- Ability to work in a fast-paced environment
