

## UX/UI INTERN ROLE

At Sage Corps, we work with students to find the right role based on their experience, skills and qualifications. This intern role description will give you an idea of the type of responsibilities that will be assigned to you during the course of your program. The descriptions below are based on a previous startup role we've offered. However, please note that this internship will vary depending on the startup partners and available roles for that term.

### About the Startup:

You will be joining a startup currently building a platform designed to transform the personal development industry. You'll work on a system that uses science-backed assessments and AI-powered algorithms to guide each individual through a fully personalized journey, providing the human connection and tools they need at the right moment. The platform aims to offer access to virtual 1:1 coaching sessions, virtual and in-person training across areas of interest, curated digital content, and on-demand support from industry experts.

### Internship Overview:

As part of a small team of two co-founders, you will work as a UX/UI Intern supporting the development of new platform features. You will design and build custom dashboards tailored to different user types. The ideal candidate is proactive, highly motivated, and passionate about artificial intelligence.

### Responsibilities:

- Design and build custom dashboards on our platform, using our existing dashboard as a model
- Perform extensive market research
- Working to build questionnaires based on research including writing new questions, reviewing and translating
- Create individual skills and activities which the platform is assessing

### Qualifications:

- Proficient in JavaScript & React JS (Next JS not a requirement)
- Proactive mentality
- Strong problem-solving skills
- Self-motivated and results-oriented
- Ability to interact with cross-functional team and a teamplayer
